

REPORT

Directed to: nurses.

Number of hours: 15 theoretical hours; 11 practical hours.

Place: Centro Médico Teknon, Clínica Diagonal and URD Barcelona.

Date: April 1st to 3rd 2019.

Summary

In the 14th edition of the Urodynamics Course attended nurses who are working or will be working in a urodynamics unit.

The course was structured in a theoretical and practical programme. The aim was to teach the principles and basis of urodynamic techniques, indications, types of patients and performance of the test, ending with the interpretation and trace review.

In this course, Dr Borau and the nurse Montserrat Morcillo from Institut Guttman, talked about neurogenic patients.

The theoretical course as well as the discussion and interpretation of the urodynamics traces were done in CMTeknon and Continencia venue.

The practices were carried out in centers where Dr. Batista and his team performed urodynamic test: Hospital Quirón Teknon, Clínica Diagonal and URD Barcelona.

The course was evaluated by all the participants and the results were satisfactory (4.8 out of 5) and they evaluated very positive:

- Clinical cases and their discussion.
- Speakers.
- Communication during the course

Participants: 7 nurses.

From: Mallorca, Comunitat Valenciana, Galicia, Pais Basc.
