

REPORT

Directed to: Health-care professionals involved in the diagnosis and treatment of incontinence and voiding dysfunction, who wish to gain autonomy in performing and interpreting urodynamic studies.

Number of hours: 15 theoretical hours; 11 practical hours.

Place: Centro Médico Teknon, Clínica Diagonal , Hospital Sagrat Cor , URD Barcelona, Gallery Hotel and Laboratorios Gebro.

Date: February 20th to 23rd 2017.

Summary

In the 9th edition of the Urodynamics Course attended 10 doctors from around Spain and a physiotherapist.

The course was structured in a theoretical and practical programme. The aim was to teach the principles and basis of urodynamic techniques, indications, types of patients and performance of the test, ending with the interpretation and trace review.

As newness, we connected with one of ours urodynamics unit where an urodynamic test was performing at that moment.

The theoretical course as well as the discussion and interpretation of the urodynamics traces were done in Gallery Hotel and Laboratios Gebro.

The practices were carried out in centers where Dr. Batista and his team performed urodynamic test: Hospital Quirón Teknon, Clínica Diagonal, Hospital Sagrat Cor and URD Barcelona.

The course was evaluated by all the participants and the results were satisfactory (3.8 out of 5) and they evaluated very positive:

- To talk about clinical cases
- Table of contents about general urodynamics.
- Small group and interaction between

Participants: 10 urologists and 1 physiotherapist.

From: Barcelona, Coruña, Madrid, Zamora, Sevilla, Jaén, Murcia and Badajoz.
