

## **3rd and 4th SEMINAR OF BLADDER DRAINAGE** **FINAL REPORT**

Directed to: Primare care nursing.

Number of hours: 4 hours

Place: CAP "Sarrià"

Dates: 25th May 2010 ( 2 sessions, morning and afternoon)

### **Summary**

Due to the demand from nurses after a general conference on incontinence was adapted bladder drainage seminar given in 2006 by CM Teknon.

The session included a theoretical overview of the indications of bladder drainage and a step-by-step review of the technical implementation of each of them (clean intermittent catheterization, permanent catheterization, suprapubic and collectors). After 1.5 hours of theoretical review, the participants did the practice on dummies with plenty of material available. The course was given with the support of two companies of drainage material (Coloplast and Hollister) and attendees had an opportunity to manipulate the material of the two brands.

Audience: 15 people, nurses and physiotherapists.

Speakers: Professional Teknon CM Urodynamics Unit and Hospital Sant Camil.
